- AC Adapter
- USB Cable
- Card Output Hopper
- Card Input Hopper
- Weight Module
- Crystal Rod and Flathead Screwdriver
- User Manual

2XL+ Full Color Badge Printer (U2XL) Printer Setup for Windows

Step 1: On your PC, Download and Install the Printer Driver Package

- IMPORTANT: Do not connect the printer to your computer until prompted by the driver installer.
- Visit this link to get the driver: <u>https://www.idesco.com/nexus-xxl-2.0-printer.htm</u>
- Scroll down the page and click on "Download Driver Now" under "Windows driver".
- Extract the compressed file folder into your desired location.
- Run the driver executable. WARNING: When the prompt to restart your computer appears, it will restart immediately when you click "OK".
- Once the driver is installed, proceed to run the driver patch executable.

Step 2: Install the Printer Ribbon

- Open the top cover of the printer.
- Insert the ribbon ID key into ID key socket.
- Insert the ribbon into the corresponding holders (blue to blue, orange to orange).
- Use the included Crystal Rod to press the button next to the colored LED until it turns blue (if it is already blue, skip this step).
- Close the top cover.

Step 3: Load the ID Cards

- Load the ID Cards into the input hopper, face up and with the slotted side closest to the roller.
- Optional: place the plastic enclosure over the top of the input hopper.

Step 4: Configure the Driver Settings (Windows)

- Ensure that the printer driver is installed properly, and that the printer is connected to your PC with the provided USB cable.
- Click on the Start Menu on your PC, then select the gear icon above the Start Menu button, then select "Devices".
- Click on the CIAAT CTC-940 printer.
- Next, select "Printing Preferences".

The following window will pop up. Please match the settings shown in this screenshot and click "Apply" then "OK" at the bottom.

When using the K 2000 Black Ribbon:

Once the driver settings are in place, you are ready to print using Microsoft Word.

2XL+ Full Color Badge Printer (U2XL) Printer Setup for Mac

Step 1: On your Mac, Download and Install the Printer Driver Package

- IMPORTANT: Do not connect the printer to your computer until prompted by the driver installer.
- Visit this link to get the driver: <u>https://www.idesco.com/nexus-xxl-2.0-printer.htm</u>
- Scroll down the page and click on "Download Mac Driver Now" under "Mac driver".
- Run the driver executable.

Step 2: Install the Printer Ribbon

- Open the top cover of the printer.
- Insert the ribbon ID key into ID key socket.
- Insert the ribbon into the corresponding holders (blue to blue, orange to orange).
- Use the included Crystal Rod to press the button next to the colored LED until it turns blue (if it is already blue, skip this step).
- Close the top cover.

Step 3: Load the ID Cards

- Load the ID Cards into the input hopper, face up and with the slotted side closest to the roller.
- Optional: place the plastic enclosure over the top of the input hopper.

Step 4: Configure the Driver Settings (Mac)

- Ensure that the printer driver is installed properly, and that the printer is connected to your Mac with the provided USB cable.
- With the appropriate Microsoft Word template open, click "File" then "Print".
- Select the CIAAT CTC-940 printer.
- Click the drop-down next to "Copies & Pages", then select "Printer Features".

The following window will pop up. Please match the settings shown in this screenshot and click "Print" when you are ready to print.
